PROFESSIONAL SUMMARY

Full-Stack Developer with over 4+ years of professional experience specializing in backend architecture, system design, and scalable RESTful API development using PHP and Laravel. Demonstrated success in accelerating web application performance by 25% to 35% through meticulous database schema optimization, query tuning, and code refactoring. Expert at securely integrating third-party payment gateways, communication networks, and geolocation services across complex CRM, healthcare, and e-commerce ecosystems. Adept at leading technical mentorship initiatives and collaborating with international clients; seeking to leverage advanced backend engineering skills to excel as a Senior Technical Lead.

TECHNICAL SKILLS

Backend Development: PHP, Laravel, CodeIgniter, RESTful API Design, Backend Architecture, System Design, Object-Oriented Programming (OOP), Role-Based Access Control (RBAC)

Database Management: MySQL, PostgreSQL, Eloquent ORM, Database Schema Optimization, Query Tuning, Query Indexing, Eager Loading

APIs & Integrations: Stripe, PayPal, Klarna, Google Pay, Twilio, SendGrid, Google Maps API, Social Authentication (OAuth), Third-Party API Integrations

Frontend Engineering: JavaScript, jQuery, AJAX, HTML5, CSS3, Bootstrap 5

Tools & Methodologies: Git, GitHub, Postman, Composer, Docker, Redis, Caching, Agile, Scrum, Software Development Life Cycle (SDLC), Code Reviews, Production Support, Problem-Solving

PROFESSIONAL EXPERIENCE

PHP / Laravel Developer (Freelance) | Self-Employed, Remote

Apr 2026 - Present

- Architected scalable RESTful APIs for 5+ international client engagements, ensuring secure end-to-end data transmission.
- Developed and maintained custom Laravel/PHP web applications, integrating 4+ third-party services including Stripe, PayPal, and Twilio into production systems.
- Optimized MySQL/PostgreSQL databases and application performance through query tuning and caching, achieving a 25% reduction in average API response times.

PHP / Laravel Developer | WTS Technologies, Pudsey, UK (Remote)

Apr 2025 - Apr 2026

- Engineered performance enhancements and refactored core codebases, boosting system speeds by 35% using Laravel and MySQL.
- Designed and developed secure, scalable RESTful APIs powering CRM, healthcare, real estate, e-commerce, booking, and media management platforms for UK-based clients.
- Integrated 5+ third-party services including Stripe, PayPal, Twilio, SendGrid, Google Maps API, and social authentication providers into multi-system architectures.
- Implemented authentication, authorization, role-based access control (RBAC), and security best practices to protect sensitive user data.
- Led technical mentorship for junior developers, guiding them through complex backend and API design issues and strengthening overall team delivery velocity.
- Delivered 8+ client projects on schedule while participating in the full SDLC and conducting code reviews.

PHP / Laravel Developer | iRoid Solutions, Surat, India

Dec 2022 - Feb 2025

- Accelerated transaction processing throughput by 30% through advanced query optimization and database tuning.
- Designed and implemented secure RESTful APIs consumed by web and mobile clients across CRM, booking, healthcare, and e-commerce applications.
- Integrated Stripe and PayPal payment gateways across 3+ client platforms, enabling secure online transactions and subscription management.
- Managed database design, schema creation, migrations, and relationships using Laravel Eloquent ORM.
- Strengthened application security through authentication, authorization, input validation, and secure API implementation

Software Developer | Squad Tech Pvt. Ltd., Ahmedabad, India

Dec 2021 - Oct 2022

- Transitioned from intern to full-time developer within 6 months by demonstrating strong technical and problem-solving abilities.
- Integrated third-party APIs to automate business processes and extend application functionality for client-facing features.
- Upgraded and maintained PHP-based applications, including CodeIgniter projects, resolving legacy bugs to meet evolving client requirements

KEY PROJECTS

Lumity Web - Laravel, PHP, MySQL (Freelance): Full-stack build of a media/article-saving platform with a shared backend architecture serving both web and mobile clients, combining a private knowledge library with a public discovery feed.

MBS CRM APIs - PHP, MySQL, REST (WTS Technologies): Built a secure RESTful backend for CRM operations with token-based authentication, standardized HTTP routes, and modular endpoints for user, profile, and workflow management.

FeverFM Radio APIs - PHP, MySQL, REST (WTS Technologies): Developed a RESTful backend delivering paginated JSON content (news, podcasts, schedules, galleries) to web and mobile clients, centralizing data logic for scalable content delivery.

Safeway Rider - PHP, MySQL, Stripe (WTS Technologies): Implemented Stripe payment integration for a driving school booking platform, enabling secure online payments for lesson bookings.

Klaptv - Laravel, PHP, MySQL, Stripe, PayPal (iRoid Solutions): Optimized and resolved production bugs for a virtual-tour platform serving 50,000+ users across 180+ countries, with dual payment gateway support (Stripe & PayPal).

Wenue - Laravel, PHP, MySQL (iRoid Solutions): Collaborated within a development team to build an event-venue booking platform with search, direct communication, and localization features.

EDUCATION

Master of Computer Applications (MCA)

2020 - 2022

CMPICA - Charusat University

Bachelor of Computer Applications (BCA)

2017 - 2020

Vivekanand - VNSGU University
